Attorney Charges That Life Was Worth More in Argonne Than in Mexico.

San Antonio, Tex., Jan. 15. - The senate subcommittee investigating the Mexican situation heard stories of cruelty, unredressed murders and devastation of properties.

The effect of their testimony was to strengthen the claims of witnesses heard in Washington that the insecurity of American life and property in Mexico is growing greater. Britt, who reminded the committee

that he is not employed by any oil company, asserted that American life was "worth more in the Argonne than it is today in the country about Tampico." He entered the United States only two days ago. He is one of the men who assisted in caring for the bodies of F. J. Roney and Earl Boles, who were killed Dec. 30. Britt appeared confident that the

Britt told the committee Americans stood guard over the bodies until an autopsy could be held. "We had one experience of neglecting that phase of such a case," he said, "when James Wallace was shot. I know for a fact he was not a drinking man, and yet the claim set up by the Mexicans was that he was drunk. And this is what happened. They had poured tequila into his mouth and over his face after he was dead in order that the odor might support their claim."

# AT ELLIS ISLAND

SENSATIONAL CHARGES AGAINST A. F. O. L. ARE MADE BY ATTORNEY

Washington, Jan. 15 .- Immediate release on bail of aliens held at Ellis Island for alleged "red' activities was demanded today of the labor department by the attorney for the aliens, Charles Recht, of New York City. Recht also asks reduction in the amount of bail fixed. In an interview Recht mentioned the American Federation of Labor in connection with the "red" raids.

"Archibald Stevenson, of the Lusk committee," he said, today, "has repeatedly stated that Samuel Gompers is heartily in accord with the committee's activities. This has given the impression that the American Federation of Labor is one of the forces behind the raids conducted both by the Lusk committee and the attorney general's department, Stevenson's statements have never been repudiated by Gompers.'

#### DEATH.

By Carrier, Per Week, 12c.

Death is not, to the aged christian, what it has often been cailed, "paying the debt of nature." No, it is not paying a debt. It is rather like taking a check to a bank to obtain solid gold in exchange for it. Often you bring a weak body, full of pain, you lay it down, and receive for it eternal treasures.

Let death come when it will, it can do the christian no harm, for it will be but a passage from a life which is often full of pain, to a haven of rest, and there to meet and greet many loving friends who had passed on alread. We are to think of this blessed reunion as one of our consolations when our dear ones have left us.

We sometimes congratulate ourselves at the moment of waking from a troubled dream. So it may be the moment after death. A good man being asked, during his last illness, whether he thought himself dying, "Really friend, I care not whether I am or not; for if I die I shall be with God; if I live, He will be

Some have gone so far as to seem almost to court death. One such has said: "Thanks to that fatal decree which dooms us to die; thanks to that gospel which opens the visions of an endless life; and thanks above all to that Saviour friend who has promised to conduct the faithful through the sacred trance of death into a Paradise of everlasting delight."

Hope is the anchor of the soul for attainment; "but hope that is seen is not hope, for what a man seeth, why doth he yet hope for; but if we hope for that we see not, then do we with patience wait for it." So it is, that the christian hopes for heaven, and with patience awaits God's time for seeing it.

A day or two ago, a dying woman, who in life had been a christian saint, was on her death bed, only a few hours before going home to heaven. A dear lady friend called to see her and was admitted to her bed chamber. She called the lady by her first name and expressed her gratitude at seeing her. After a little conversation, the vital spark of life being so feeble, the woman dropped into what seemed a little doze, but her face light- officers: W. F. Executive committseemed to dose off again and the smile as before beamed from the tee, L. S. Farquhar, J. O. McDorface. The incident was so marked, so impressive, that the visitor man. Albert Mercer, on Thursday repeated it to several friends. Who will say that God did not give to this, one of His children, an advance peep into heaven, dining hall of the latter. Covers will and that she saw and greeted loved ones who had gone on before? be laid for two hundred or more. Who will take from those bereft, this consoling thought and At which time affairs pertaining to belief?

#### HERBERT HOOVER WOULD NOT "HOTHOUSE" EUROPE WITH FURTHER LOANS.

Herbert Hoover is the American who knows. We can take the limitation out of that last sentence. Hoover is the man who knows. He got into the war game long before the nation did, as a famine-fighter and a student of economic conditions caused by war. As soon as the armistice was signed he became generalissimo of all the Allied forces mobilized to cope with the industrial Springfield this week, where he is and food chaos into which demobilized Europe promptly plunged. He has had opportunities to study conditions all over that continent through first-hand experience and inquiry—to say nothing of delegated investigation-which no other living man has ever ap- Lorimer in a meeting in Jamestown. proached. In Poland, in panic-ridden Vienna, in isolated Czecho-Slovakia, in stumbling Italy, wherever in the Old World they know their nephew, Dwight Frye, of Denhunger and shiver from exposure, they call on the name of ver, who is a member of the "Hoover" and no one else for succor.

And "Hoover" says that what Europe needs today is not to

go to the money-lenders but to work!

This is very interesting in view of the fact that Sir George Paish, the noted British financial expert, is visting this country just now in search of a three-year credit for Great Britain totaling \$10,000,000,000 and that Viscount Grey was described by Hearst's American the other day as having "touched" one Woodrow Wilson for a loan of thirteen billions. The fact that the said Woodrow Wilson could not assure him an American Government loan of thirteen cents did not detract at all from the function with which this fable was launched. Sir George Paish, of course, speaks plainly enough, but speaks entirely for himself. The British Government is not asking that ten billions; and a part of the London press deny indignantly that any one there. is fool enough to believe that it could be got .- Public Ledger.

#### **BRYAN CONFIDENT** OF EACH ACTION ON TREATY RATIFICATION

Chicago, Jan. 15 .- William J Bryan arrived in Chicago today en route to Washington and made the confident assertion that the peace treaty will be ratified by congress within a few days. He did not state why the senate would take such early action other than to suggest that it was because the people wanted action.

"The sentiment of the people everywhere,' he said, "is overwhelmingly in favor of immediate action. They are interested in action rather than phraseology.

"The telegrams I sent to various senatorial friends did not call for answers. They called for action and I believe they will give that response. Most people differ regarding the wording of the treaty, but every one wants action."

ABOUT HALF OF STREET LIGHTS PROVIDED UNDER NEW

Workmen for the Dayton Power & Light Company have about half of the new electric lights provided for under the new contract recently signed by the city, installed.

The lights offer signal advantages over the old form of arc lighting which has been in effect here for a number of years, providing light and longer service for a much cheap-

Under the old system there were 147 arc lights in this city, at a cost annually of \$61.92 apiece, or a total annual cost of \$9,102.24. The lights developed 37,750 candle power under the old plan, and were operated on a "moonlight" basis, being lighted only in the dark

Under the new system, there will be 179 lights, the total cost of which will be \$7,487.50. The new system will develop 44,550 candle power which is 7,800 more than under the old are light plan at a cost of \$1,-614.74, and under the new plan the city is given all night service, every night, whether moonlight or not.

years with rheumatism. Many times this terrible disease left him helpless and unable to work.

He finally decided after years of ceaseless study, that no one can be free from rheumatism until the accumulated impurities, commonly called uric acid deposits, were dissolved in the joints and muscles and expelled from the body.

With this idea in mind he consulted physicians, made experiments and finally compounded a prescription that quickly and completely banished every sign and symptom of rheumatism from his system.

He freely gave his discovery to others who took it, with what might be called marvelous success. After years of urging he decided to let sufferers everywhere know about his discoverve through the newspapers. "How do I know! Why don't you ask her?"

Oh, Robert, how could I?" Robert was still depressed and a bit morose. It seemed futile to try to talk to him so desisted. It was as bad as living with a bear with a sore paw, I told him, he was so grouchy. After breakfast I said to Aunt Felicia-as Robert had insisted I call

## The Jury Was Blindfolded AND

-when Hempel stood beside the New Edison and sang in direct comparison with its RE-CREATION of her voice, not a man could tell one voice from the other.

Do you realize that this is the most severe musical test ever attempted? Do you appreciate that blindfolding these musical experts greatly increased their acuteness of hearing?

But acuteness of hearing did not avail. Like 1. 2,000 previous tone-tests, the New Edison proved that its RE-CREATION was not merely like Hempel's voice. It was Hempel's voice—indistinguishable from her living voice.

If you own a phonograph, or know phonographs, you must realize how wonderful this is, -how extraordinary these Edison RE-CREATIONS must be. You will still further realize this when you come into this store and hear them for yourself. Make Hempel the basis of this interesting discovery. Listen with your eyes closed, while we play one of her gems for you.

release on bail of aliens held at Ellis Island for alleged "red' activities was demanded today of the labor department by the attorney for the aliens, Charles Recht, of New York City, Recht also asks reduction in the amount of bail fixed. In an interview Recht mentioned the American Federation of Labor in connection with the "red" raids.

"Archibald Stevenson, of the Lusk committee," he said, today, "has repeatedly stated that Samuel Gompers is heartily in accord with the committee's activities. This has given the impression that the American Federation of Labor is one of the forces behind the raids conducted both by the Lusk committee and the attorney general's department, Stevenson's statements have never been repudiated by Gompers.'

Recht quoted solicitor John W. Abercrombie, of the labor department, as stating that the "soviet ark" was an experiment, and there was doubt whether it would be able to land.

Death Awaits Many "Ten per cent of the four thousand aliens being held at Elice Island," said Recht, "are Hungar. ans To deport these men to Hungary at the present time would mean certain death. ### DEMPSEY WAS NOT DRAFT DODGER SAYS

In a formal statement issued through his manager, Jack Kearns, Dempsey sought to escape military service. Kearns statement follows:

When the draft call came in 1917, Jack Dempsey was placed in class 4-A. This was because he was a married man and in addition was supporting his mother, and invalid Dromer and a sister. Dempsey at the time made no claims for exemption, merely stating the true facts in his own case when filling out his questionnaire.

Dempsey in class A-1, but almost immediately afterward put him in ject any day to call for war duty.
If the conflict had lasted a few weeks longer it seems a certainty that Dempsey would have been in the uniformed service.

#### DEATH.

Death is not, to the aged christian, what it has often been called, "paying the debt of nature." No, it is not paying a debt. It is rather like taking a check to a bank to obtain solid gold in exchange for it. Often you bring a weak body, full of pain, you lay it down, and receive for it eternal treasures.

Let death come when it will, it can do the christian no harm, for it will be but a passage from a life which is often full of pain, to a haven of rest, and there to meet and greet many loving friends who had passed on alread. We are to think of this blessed reunion as one of our consolations when our dear ones have left us.

We sometimes congratulate ourselves at the moment of waking from a troubled dream. So it may be the moment after death. A good man being asked, during his last illness, whether he thought himself dying, "Really friend, I care not whether I am or not; for if I die I shall be with God; if I live, He will be

Some have gone so far as to seem almost to court death. One such has said: "Thanks to that fatal decree which dooms us to die; thanks to that gospel which opens the visions of an endless life; and thanks above all to that Saviour friend who has promised to conduct the faithful through the sacred trance of death into

a Paradise of everlasting delight." Hope is the anchor of the soul for attainment; "but hope that is seen is not hope, for what a man seeth, why doth he yet hope for; but if we hope for that we see not, then do we with patience wait for it." So it is, that the christian hopes for heaven, and with patience awaits God's time for seeing it.

A day or two ago, a dying woman, who in life had been a christian saint, was on her death bed, only a few hours before going home to heaven. A dear lady friend called to see her and was admitted to her bed chamber. She called the lady by her first name and expressed her gratitude at seeing her. After a little conversation, the vital spark of life being so feeble, the woman dropped into what seemed a little doze, but her face light- officers: ed up with a radiant smile as if meeting a friend. Presently she again opened her eyes and greeted her lady friend, and later con, treasurer. Executive committseemed to dose off again and the smile as before beamed from the tee, L. S. Farquhar, J. O. #### HERBERT HOOVER WOULD NOT "HOTHOUSE" EUROPE WITH FURTHER LOANS.

Herbert Hoover is the American who knows. We can take the limitation out of that last sentence. Hoover is the man who ents, Mr. and Mrs. W. D. Ferguson. knows. He got into the war game long before the nation did, as a famine-fighter and a student of economic conditions caused by war. As soon as the armistice was signed he became generalissimo of all the Allied forces mobilized to cope with the industrial springfield this week, where he is and food chaos into which demobilized Europe promptly plunged. This is very interesting in view of the fact that Sir George Paish, the noted British financial expert, is visting this country just now in search of a three-year credit for Great Britain totaling \$10,000,000,000 and that Viscount Grey was described by Hearst's American the other day as having "touched" one Woodrow Wilson for a loan of thirteen billions. The fact that the said Woodrow Wilson could not assure him an American Government loan of thirteen cents did not detract at all from the function with which this fable was launched. Sir George Paish, of course, speaks plainly enough, but speaks entirely for himself. The British Government is not asking that ten billions; and a part of the London press deny indignantly that any one there. is fool enough to believe that it could be got .- Public Ledger.

ABOUT HALF OF STREET LIGHTS PROVIDED UNDER NEW CONTRACT

Workmen for the Dayton Power & Light Company have about half of the new electric lights provided for under the new contract recently

Under the old system there were 147 arc lights in this city, at a cost annually of \$61.92 apiece, or a total annual cost of \$9,102.24. The lights developed 37,750 candle power under the old plan, and were operated on a "moonlight" basis, eing lighted only in the dark

Under the new system, there will be 179 lights, the total cost of which will be \$7,487.50. The new system will develop 44,550 candle power, which is 7,800 more than under the old are light plan at a cost of \$1,-614.74, and under the new plan the city is given all night service, every

night, whether moonlight or not. According to City Manager Riddle had the old plan been all night service it would have cost \$3,174.74

more money than the new system. Under the plan the city is also given 32 more lights which is 21 per cent more than were used to light the city under the old contract.

It is expected that the workmen will have all the new lights installed within a few weeks.

The tournament has attracted interest in the basketball circles of the vicinity and eight teams have been entered by their respective schools. The different teams were assigned numbers and a drawing was held to determine what teams would meet in the preliminary round. The drawing resulted in the following teams meeting each other to obtain the right to enter the second round in the struggle for first place: Wednesday night, first game, Jamestown and Bellbrook, second game Yellow Springs and Caesarcreek, Thursday night, first game, Bowersville and Cedarville. second game, Beavercreek and Port William.

The Central high school team will not be entered in the tournament as it would have too great an advantage in playing upon its own floor but it is very likely that a game will be arranged between them and the team that wins out in the near future.

## The Jury Was Blindfolded AND

-when Hempel stood beside the New Edison and sang in direct comparison with its RE-CREATION of her voice, not a man could tell one voice from the other.

Do you realize that this is the most severe musical test ever attempted? Do you appreciate that blindfolding these musical experts greatly increased their acuteness of hearing?

But acuteness of hearing did not avail. Like 1. 2,000 previous tone-tests, the New Edison proved that its RE-CREATION was not merely like Hempel's voice. It was Hempel's voice—indistinguishable from her living voice.

If you own a phonograph, or know phonographs, you must realize how wonderful this is, -how extraordinary these Edison RE-CREATIONS must be. You will still further realize this when you come into this store and hear them for yourself. Make Hempel the basis of this interesting discovery.
